EXAMINER

HAUGLAND, SCOTT J

ART UNIT	PAPER NUMBER
----------	--------------

3654

DATE MAILED: 04/27/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/085,813	Applicant(s) WOJCIK ET AL.	
	Examiner Scott Haugland	Art Unit 3654	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 71-106 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 71-106 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/10/06 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 88 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 88 recites the limitation "the winding module" on lines 3-4. There is insufficient antecedent basis for this limitation in the claim. More than one winding module was previously recited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 71-74, 77, 83, 87, and 90 are rejected under 35 U.S.C. 102(b) as being anticipated by Alfio (U.S. Pat. No. 4,139,164).

Alfio discloses a winder for web comprising a web transport apparatus including a conveyor belt 20 and a plurality of winding modules positioned along the web transport apparatus. Each winding module comprises a mandrel 26a-26d in operative association with a driving device for rotating the mandrel and a positioning apparatus (32a-32d, 30a-30d, counterweights or elastic means, etc.) in operative association with the mandrel configured to move the mandrel into and out of engagement with the conveyor belt.

With regard to claim 73, the motor would inherently brake the belt and mandrels at times during operation.

With regard to claim 90, note that the mandrel does not engage the conveyor belt when a layer of the material being wound has built up on the mandrel.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 75, 84, 91-99, 101, and 103-106 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio (U.S. Pat. No. 4,139,164) in view of Nistri et al (U.S. Pat. No. 4,583,698).

Alfio is described above.

Alfio does not disclose a vacuum conveyor as recited in claim 75. Alfio does not disclose that the winding modules are positioned at the end of a tissue machine (claim 84). Alfio does not disclose unwinding web from a parent roll of tissue (claim 91) or placing a core on the mandrel (claim 92). Alfio does not explicitly disclose winding, loading, and stripping material from mandrels substantially at the same time (claim 104) or the process recited in claim 106.

Nistri et al teaches using a vacuum conveyor 9 and vacuum roll 8 to feed and facilitate threading of a web in a winder (claim 75). Nistri et al teaches winding tissue web unwound from a parent roll (claim 91) and placing a core on a winding mandrel (claim 92).

With regard to claim 75, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Alfio with a vacuum conveyor for

Art Unit: 3654

feeding the web to the winding modules as taught by Nistri et al to maintain feeding engagement with the web and to facilitate threading through the winding apparatus.

With regard to claim 84, it would have been obvious to position the winding modules at the end of a tissue machine since Alfio would clearly be capable of winding tissue.

With regard to claims 91, it would have been obvious to use the apparatus for winding tissue as taught by Nistri since Alfio would clearly be capable of winding tissue. It would have been obvious to supply the tissue from a parent roll as taught by Nistri to form small rolls.

With regard to claim 92, it would have been obvious to provide a core on the mandrels as taught by Nistri et al to facilitate attachment of web and removal of the wound product.

With regard to claims 96 and 97, note that the center of the mandrel is driven by contact of the roll with the conveyor belt.

With regard to claim 104, it would have been obvious to wind, load, and strip material from mandrels substantially at the same time since the winding modules of Alfio are disclosed for independent operation.

With regard to claim 105, cutting of the web at the end of a roll of material would have been obvious since it is routine to do so in winding operations and is taught by Nistri et al.

The method of claim 106 would have been an obvious method of using the apparatus of Alfio due to the disclosed independence of the winding modules.

Claims 76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio (U.S. Pat. No. 4,139,164) in view of Menz et al (doc. no. WO 98/52857).

Alfio is described above.

Alfio does not disclose a web transport apparatus that is an electrostatic belt.

Menz et al teaches using an electrostatic belt (in lieu of rollers 3, 4) to feed web material (page 6, third full paragraph; col. 3, lines 24-29 of corresponding US Pat. No. 6,264,132).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Alfio with a web transport apparatus in the form of an electrostatic belt as taught by Menz et al to provide more positive gripping and feeding of the web.

Claim 78 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio (U.S. Pat. No. 4,139,164) in view of Diltz (U.S. Patent No. 3,869,095).

Alfio is described above.

Alfio does not disclose a vacuum supplied mandrel.

Diltz teaches providing a winding apparatus with vacuum supplied mandrels 40, 41 for attaching a leading end of web to be wound to the cores.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Alfio with vacuum supplied mandrels as taught by Diltz to attach web to the cores without the need for adhesive.

Art Unit: 3654

Claim 79 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio in view of Pretto et al (U.S. Patent No. 5,379,964).

Alfio is described above.

Alfio does not disclose that the mandrels are made of a carbon fiber composite.

Pretto et al teaches forming a web winding mandrel of a carbon fiber composite to provide a lightweight mandrel having high strength and stiffness.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the mandrels of Alfio of a carbon fiber composite as taught by Pretto et al to make them light weight with high strength and stiffness.

Claim 80 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio in view of Dowd (U.S. Patent No. 4,133,495).

Alfio is described above.

Alfio does not disclose a tail sealing apparatus.

Dowd teaches providing a web winding apparatus with a tail sealing apparatus to prevent unwinding of an outer end of a web from a finished roll.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Alfio with a tail sealing apparatus as taught by Dowd to prevent unwinding of an outer end of the web from a completed product roll.

Claim 81 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio in view of Urban (U.S. Patent No. 4,988,052).

Alfio is described above.

Alfio does not disclose applying adhesive to the web prior to engagement with one of the winding modules.

Urban teaches applying adhesive to the leading end and trailing end of web 7 being wound before it engages winding modules 4, 5, 6.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to apply adhesive to the web in Alfio prior to engagement with one of the winding modules as taught by Urban to facilitate attachment of the web to the modules and initiation of winding.

Claims 82, 85, 86, 88, and 89 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio in view of Dusenbery (U.S. Pat. No. 4,208,019).

Alfio is described above.

Alfio does not disclose a core loading or product stripping apparatus.

Dusenbery teaches providing a winding apparatus with a core loading and product stripping apparatus.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Alfio with a core loading and product stripping apparatus as taught by Dusenbery to reduce manual labor required to operate the apparatus.

With regard to claims 88 and 89, the winding modules are inherently slidable to the side opposite the loading and stripping side of the web transport apparatus by disassembly.

Claim 100 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio in view of Nistri et al as applied to claim 91, and further in view of Dowd (U.S. Patent No. 4,133,495).

Alfio does not disclose sealing a trailing edge of the web to the rolled product.

Dowd teaches cutting web after forming a full roll and sealing a trailing end of the web to the finished roll.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to seal the trailing end of the web to the roll in Alfio as taught by Dowd to prevent unwinding of the roll during subsequent handling.

Claim 102 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfio in view of Nistri et al as applied to claim 91 above, and further in view of Menz et al (doc. no. WO 98/52857).

Alfio does not disclose a web transport apparatus that is an electrostatic belt.

Menz et al teaches using an electrostatic belt (in lieu of rollers 3, 4) to feed web material (page 6, third full paragraph; col. 3, lines 24-29 of corresponding US Pat. No. 6,264,132).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Alfio with a web transport apparatus in the form of an electrostatic belt as taught by Menz et al to provide more positive gripping and feeding of the web.
